TOTALLY MESSED UP CONTROLS!!!!!! Who created this? People with no mice? Why can't I use a friggin' MOUSE?! it's 2019 for crying out loud! THE CONTROLS ARE HORRENDOUS! Not made for people with regular hands and fingers.. thirty years ago maybe this game would have been interesting. TOTALLY MESSED UP CONTROLS!!!!!! Who created this? People with no mice? Why can't I use a friggin' MOUSE?! it's 2019 for crying out loud! THE CONTROLS ARE HORRENDOUS! Not made for people with regular hands and fingers.. This is nice game with camera flaw, but it's NICE!. Bleh. Another console game masquerading as a computer game.. This is more of a first impression of the game. However after following the game since 2016 i think it was? THis title has come a long way. After seeing the reviews and the problems people are complaining about i can see where the frustraation comes from but at the same time its a little silly. The camera is fixed similar to onimusha and resembles that game a bit. It works however so far and dont see a serious issue with this. The combat is challenging but not so bad and as far a the difficulty goes i love hard games and that is not a problem for me at all. I read somewhere tthat they are tweaking it but i hope it doesnt get to ez. idk what people are expecting for a 20 game i mean of course it wont be as polished or look the greatest but look at what youre buying. Im enjoying the game so far and i expect to throughout. GOOD JOB DEVS and dont drop this game.. The is the final time I buy something published by 1C 75% of my playtime is grinding to defeat the game's second boss If you want someone to uber grind then you should have some content to grind in instead of walking back and forth the areas covered in the first ten minutes of the game It feels very much like a troll edited the config ini with absurd leveling requirements and ran off I originally linked to a game play video on Youtube showing how long it took to battle the second boss but someone had the owners' account closed.. The game content many bugs - when i tried to get last shard health in area of Tyr, my Bior sometimes can't walk, he's stun and dead. Many times he can't withdraw weapon for slash after hit enemy have magic shield.

Development Update : Its been almost 4 years since we started the development of Eternity The Last Unicorn and we are happy to announce that we are finally in the last phase of this journey. It has been a long process of learning, combined with a lot of effort and many hours of hard work to develop something interesting that can please the fans of adventure, fantasy and RPG games. Eternity brings a nostalgic feeling to players who had the chance to play classic games like Onimusha or Resident Evil, but at the same time it offers fresh ideas and new gameplay mechanics. During the last months, we had the chance to demonstrate the game to a number of public events such as PAX East and Gamescom where we had the opportunity to see how the players react with the game and get valuable feedback that would help us to improve the game in the future. Since then, weve added many new features to the final gameplay, polished the scenarios and the enemies from textures to mechanics and AI. Apart from these, we also reworked a number of features such as the character evolution, weapon evolution, crafting system, combat system, and added puzzles and new skills. Additionally, the enemies are now divided into different classes like Healer, Berserker and Mage among others. Eternity The Last Unicorn features about 12 hours of gameplay and for the players who enjoy Nordic mythology, we have many references and stories scattered throughout this universe. We are soon planning to announce the release date on all platforms, so stay tuned! As we get closer to the release, we will be sharing new images and bringing new information weekly to all users who are interested about Eternity and to all who already follow Void Studios and 1C Entertainment on the social media. Lastly, in case you are interested in Eternity - The Last Unicorn, we would be thrilled if you add the game to your Steam wishlist! This is the best support you can offer us at the moment..
