About This Game

COMMUNITY-MADE MOD FOR RED ORCHESTRA 2/RISING STORM

Heroes of the West is a mod created by the RO2 community which brings the RO2/RS experience to the Western European theater, pitting the US forces against the German Wehrmacht. It also introduces a whole new faction, the British, bringing the 'Tommies' to the RO2 experience. The mod has been developed with support from the developers, Tripwire Interactive. It includes 4 new maps, 5 new character sets and 10 new weapons.

The initial release of Heroes of the West on Steam will feature 4 maps:

- Omaha Beach - The US 29th Infantry Division storm the bloody beaches of Normandy during the 'Longest Day', June 6th 1944, battling against well dug-in Wehrmacht troops of the 352. Infanterie-Division.

- Carentan - Immediately after the invasion of mainland Europe on D-Day, units of the US 101st Airborne division fought to capture the key town of Carentan from the Fallschirmjäger-Regiment 6. This was the first encounter between US airborne troops and their German counterparts in the Western Front theater.

- Port Brest - During the brutal fighting for the key port of Brest from 7 Aug to 19 Sept 1944, the 2 Fallschirmjäger-Division defend against the US 2d Ranger Battalion. This was an encounter between the best troops of both sides and involved bitter street to street battles.

- Oosterbeek - Operation Market Garden was a bold attempt to get allied troops across the Rhine and into Germany before the end of 1944. In this map, troops of the British 1st Airborne defend the town of Oosterbeek against a mixed bag of German troops pushing into the key Rhine crossing at Arnhem, attempting to seize it back from the lightly armed British before the arrival of relieving mechanised ground forces.

This mod is pretty good. It allows you to experience Red Orchestra 2 on the Western Front which I think is a pretty cool idea. It does have some problems but the dev's are trying their very best to frequently update their game and make it better. Infact Yesterday they did an update which adds in Regular British forces in the Caen Outskirts map.

This mod adds in new skins for the factions and also adds in Regular British infantry and the British 1st Parachute Brigade with their own weapons and gear.

There is some room to improve like there being a somewhat lack of servers but the community is growing and the mod is slowly getting better and better.

Overall I would recommend it if you are a fan of the Red Orchestra series .. Have a good maps but is very unbalanced in some maps, in AT guns the allies have a bazooka the germans just granades, in others maps the germans spawn points are very far of the battle and in the bocage the grass is bulletproof, too the sigth of the new weapons is a little deviated.. Brilliant addition to the game! Well done modders!. Storm Normandy. Get sprayed down by MG-42 placement.
-10/10

It is honestly a great mod! You should try it out it's a load of fun!. PIp Stew Webster Tom Bruce and few more of you out there still.check out this great mod.
P.s there monents where you will fell like in the old days in Carentan.. Well Holy dingle Berries! The Devs helped helped me get it to work! Simple enough of a problem: Don't join out of date servers.
Anyway, yay! Shermans, Stugs, Jeeps!!! Ardennes offensive here I come!. great mod,it works awesome,and it is still being updated.The multiplayer is not always up for this mod.. This mod is amazing, i love the Western front theme. It has very good maps, for example you can remember some of the locations from the TV series Band Of Brothers. (Brécourt Manor, Carentan, etc).

Some time ago they added new tanks into the game, M4A3 Sherman and Stug III. You have lots of custom weaponry you don't get in the normal game, example the M3 Grease gun.

You get a whole new faction with new weapons, The British Commonwealth.

What i would like is more maps, especially a Battle Of The Bulge map, i think the community really wants that map aswell.

Also i would like the normal 1928a1 Thompson get changed to the M1A1 version, you can leave the 1928a1 version for the british. Also add the Luger and the Webley pistols. The maps look very cool, but are sometimes hard to win if you are on the attacking team (usually U.S) and you don't have a good team leader.

Overall, awesome mod, you can see a lot of work went into this, if you are interested you should get this, it's free aswell!. I give it a Saving Private Ryan out of 10

you'll get shell shocked.. Cannot seem to get the game to work. Says that I do not have the files in the same location :|, cannot find the downloaded HOTW file at all. Wish it would work from the get go..sigh

. How do i get this mod running? I installed it and I start up the HOTW launcher and it doesnt have any heroes of the west content???. gt;modified uniforms of the Marines from RS for Army

>German uniforms don't render

>No new foot SFX for new surfaces

>Same weapons and SFX from RS (more of an opinion because they're ♥♥♥♥ing terrible)

>New maps' textures are worse than the base game

>Same boring and censored Marines voices

Not bueno my dudes

EDIT* Uniforms fixed by losing all my weapon level progress but hey thats cool I guess

All the uniforms still suffer the same ultra "cleaness" of RS, which still smokes balls cause they look awful and don't fit uniforms that have been blown up and shot to♥♥♥♥♥♥for prolonged periods. Developers of this mod are doing an excellent work. It completes the diversity of scenarios of the game and feels great to play. Recommended to every RO fan who wants to expand their game experience even futher,. Nobody plays it these days (the 2-3 servers available in Moscow (Russia) are almost empty).

That's why I can't even appreciate anything this mod contributes to the game.

Or maybe you've got a couple dozen friends to invite to play with you...
